

The Leader in Internet Safety Education

i-SAFE creates i-LEARN Online to Build a Responsible and Safe Cyber World

The Revolution Starts Now

The i-SAFE i-LEARN Online program is a revolutionary concept that will change the way you learn. We know you are busy and need a system of learning where you can stop, pause, and rewind at your convenience. We know you will want to focus on certain subjects first, and others later. That is why we have created an “on-demand” system for Internet safety education. i-LEARN Online has the lessons you want, when you want them, all at the click of a mouse.

What is i-LEARN Online?

It is what it says it is—online learning. i-LEARN Online is for you if you do not have time to attend our day-long Premiere Professional Development Program (PDP) in person. i-LEARN Online is for you if there is no face-to-face training in your area. The i-LEARN Online program brings the education to you. These sets of online videos on Internet safety cover the six subjects everyone needs to know in order to teach safe and responsible use of the Internet. Once you view these videos, you are trained to educate others on the subjects you have viewed. After you are trained, just fill out the implementation plan (IP), and you will receive all the materials you need free of charge.

Train-the-Trainer

Those who finish viewing all of the modules join an elite group within i-SAFE. We call these members i-SAFE Certified Train-the-Trainers. A Certified Train-the-Trainer has the added ability to teach others how to teach the i-SAFE curriculum. This is key to heightening the awareness of Internet safety issues in a community. This is the ultimate goal of the i-LEARN Online program.

i-SAFE Education Makes a Difference

- **84% of students say they are now more careful about where they go and what they do on the Internet.**
- **89% indicate they are now more careful about the e-mail attachments they open.**
- **88% are now more careful about sharing personal information with those they meet in chat rooms and other places on the Internet.**
- **73% believe there is a need for Internet safety education.**

i-MENTOR Training Network

We all know that truly safe and responsible use of the Internet cannot and will not occur without peer-to-peer mentoring. That is where the i-MENTOR Training Network takes over. This portion of the i-LEARN Online program is specifically designed to enable students to spread the message to their friends, their parents, their community, and beyond.

The Leader in Internet Safety Education Drives the Future of Online Learning

Internet Issues

A recent i-SAFE survey revealed that 53 percent of students preferred to be alone online, 31 percent admitted to chatting with people they have never met in person, and 12 percent said they had met someone face to face who they previously met online. There are cyber predators out there who are looking to take advantage of these numbers. There are “Rules of the Road” for everyone on the Information Superhighway. The i-LEARN Online program will teach you about the detours and roadblocks found online.

Community Outreach is a Must

i-SAFE is the only Internet safety education program that combines curriculum with activities for community outreach and youth empowerment. The i-LEARN Online program and the i-MENTOR Training Network will teach you how to work with i-SAFE and make a difference in the world. Step by step you will find the best method of empowering your neighbors and peers through the i-MENTOR program, i-Adopt-a-School program, i-PARENT program, i-PARENT Boards, and/or Town Hall Meetings.

i-MENTOR Training Network

The videos are for students who want to DRIVE the message of online safety to other students, parents, and community members. Various levels of certification are offered through videos concerning teaching other students, conducting assemblies, or involving parents.

i-LEARN Online

This program provides Internet users with a comprehensive series of online videos that teach about online safety and responsibility. The i-PARENT, i-FIFTY+, and i-LEARN Online programs offer parents and adults older than 50 the training and information they need not only to protect their families but to help educate others in the community about Internet safety issues.

i-PARENT Program

This is a parent presentation offering invaluable information to parents and the opportunity for them to become involved in raising Internet safety awareness throughout the community. The formation of an i-PARENT Board is the aim of an i-PARENT Program.

i-FIFTY+

This program is designed to assist the older adult with issues that are most likely to victimize them. The i-FIFTY+ program also teaches older adults about the Internet safety issues affecting the youth in our society and encourages them to join with other i-FIFTY+ members and i-PARENTS to create local i-PARENT Boards.

Get Involved:

- **Log on to ilearn.isafe.org**
- **Log in with your i-SAFE username and password, or click on “create an account”**
- **Watch the “Personal Safety” video in its entirety**
- **Submit an implementation plan to teach the “Personal Safety” lessons**
- **View the other videos in their entirety**
- **Submit an implementation plan as an i-SAFE Certified Train-the-Trainer**
